

ArcGIS 10.2 Student Edition: Downloading, Installing, and Licensing

As a student of the University of Redlands, you are entitled to a free 1-year license of ArcGIS for Desktop (10.x). The licensing of the software can be confusing because of Esri's user account systems so we have put this post together to help ease the process.

Before you download and license your 1-year license of ArcGIS for Desktop you will need:

1. **An Esri Global Account (*this is NOT a University-issued account that you may have received for class*)**

Go to <https://accounts.esri.com/signup> and enter the required information. Esri's system will send you an email to complete your profile and activate your account. *You may need to logout of your organization account before you can do this*

2. **An Authorization Code provided by the Center for Spatial Studies**

Contact the Center for Spatial Studies at spatialstudies@redlands.edu and request a Student Edition Authorization (EVA) Code

Download and Install the Software

Once you have the required both: 1) an Esri Global Account and 2) an Authorization (EVA) Code, [go to the ArcGIS for Desktop Student Trial Webpage](#) (link below) and login with your Esri Global Account. * *You may have to logout of the university organization account first**

When prompted, enter the **Authorization Number** to access the download screen.

Next, select which version of ArcGIS Desktop you wish to download.

Next, click the download button to download the **ArcGIS for Desktop** software.

Install and Authorize

How do I install and authorize the software?

Follow these steps to **install** ArcGIS 10.2.x for Desktop:

1. If not already installed, download and install the **Microsoft .NET Framework 3.5 SP1**. This is required to install ArcGIS for Desktop.
2. Ensure that you have uninstalled any previous versions of ArcGIS for Desktop or ArcGIS for Server before running the setup. Under **Uninstall Existing ArcGIS Software**, click **Detect Conflicts** to remove previous versions.
3. Extract the ArcGIS for Desktop download file and run setup.exe if the program does not launch automatically.
4. Click **Next** and accept the license agreement. Choose **Complete** and click **Next**. Click **Next** to accept all default settings, then click **Finish**.

Follow these steps to **authorize** the software:

1. Select **ArcGIS for Desktop Advanced (Single Use)**, and click **Authorize Now**.
2. Verify the software you selected is listed at the top of the box. Click **OK**.
3. Select I have installed my software and need to authorize it. Click **Next**.
4. Select **Authorize with Esri now using the Internet**. Click **Next**. If you do not have an Internet connection on the computer you intend to install the software on, you can authorize the software using another computer that has Internet access or via e-mail.

5. Enter your personal information (2 panels). Click **Next** on both.
 6. When prompted, accept the default, **I do not wish to authorize any extensions** at this time. The extensions will be authorized automatically.
 7. Enter your 12-character authorization number (EVAxxxxxxxxx), and click **Next**.
 8. After the authorization process is complete, click **Finish**. Authorization typically takes between 30 seconds and 2 minutes.
 9. Click **OK** to close the ArcGIS Administrator. The software is ready to use.
