

Getting to Know Pro - Interacting With Data

Getting to Know ArcGIS Pro – Lesson 2: Interacting With Data

This activity builds on the [Lesson 1: Interacting with Data](#), working with feature table attributes, different spatial data types, adding data, changing layer symbols, and exporting a map.

Skills

Open attribute table

Select, clear, sort and show selected table records

Select tool

Add new Map Tab and rename

Add Data by dragging from Project Pane

Add Data using Add Data button

Change layer symbology

Use Export Map button
